This agreement is subject to the Terms and Conditions on the back of this agreement. National Grid agrees to install gas service to the above location (Premises). I understand that I may cancel this agreement, without obligation, at any time prior to the installation of the gas service line and main. I hereby authorize National Grid to install a natural gas service line to the address noted above.

**TERMS AND CONDITIONS OF RESIDENTIAL GAS SERVICE AGREEMENT** (Pg 2 NH)

1. In the event that the actual service line length and/or main extension exceed tariffed allowances, National Grid (NG) will require a contribution in aid of construction (CIAC). This payment must be made before any work is scheduled.
2. Once the meter is set, the Applicant becomes the customer of record and NG will commence billing the Applicant and the Applicant agrees to pay for gas service pursuant to the applicable rate classification and in accordance with NG's terms and conditions as filed from time to time with the New Hampshire Public Utility Commission.
3. NG will take reasonable measures to minimize any damage to Applicant's property. For existing homes, NG will loam and reseed excavated areas and patch disturbed asphalt. Applicant is responsible for maintaining all reseeded areas.
4. NG shall install the necessary natural gas distribution system to the site, subject to weather conditions and all federal, state and local codes and permit requirements. In the event that NG is unable to obtain the necessary permits to install the gas service line, NG shall not be obligated to perform such installation and this Agreement shall be null and void.
5. NG's obligations under this Agreement are subject to verification that there is an active natural gas main in close proximity to the Premises from which a service connection can be made in a reasonably cost effective manner.
6. (New Construction Only) Applicant shall construct, or cause the construction of all necessary water lines, sewer lines, roads and electrical lines, and will perform other necessary work required to prepare the site for installation.
7. Applicant shall provide all easements and rights-of-way necessary for NG to install natural gas distribution lines required to provide service to the Premises.
8. Applicant represents and warrants that it has provided NG with all information known to it concerning environmental contamination or threat thereof at or in the vicinity of the Premises.
9. Applicant assumes full and complete responsibility for any and all costs associated with any environmental contamination encountered by NG during the installation, including but not limited to the costs to cleanup or remediate such contamination.
10. In the event that environmental contamination is encountered during the installation, all work shall cease and NG shall provide immediate oral and written notice to the Applicant within a reasonable period of time. Thereafter, NG shall have no further obligations under this Agreement.
11. Applicant shall, to the fullest extent permitted by law, indemnify, hold harmless and release NG, its parent company, affiliates and subsidiaries and their respective directors, officers, employees, agents, servants, representatives, successors and assigns from and against all claims, demands, liabilities or expenses related to environmental contamination at or in the vicinity of the Premises. This indemnity and release provision survives the expiration or termination of the Agreement and extends to the respective successors and assigns of NG and Applicant.
12. NG shall own the natural gas distribution system up to the outlet side of each individual customer meter.
13. All installations where excavating and backfilling are to be performed by Applicant or his/her designee will be performed in compliance with NG's specifications, and the installation shall not commence until said trench is inspected and accepted by a representative of NG.
14. Prior to the start of the work described on the front of this agreement, Applicant is responsible for marking out any underground facilities on their property that are not marked out as a result of NG's notification of the Dig Safe system. NG is not responsible for any damage to any underground facilities on Applicant's property for which Applicant is responsible for marking out, including repair, replacement or costs associated with repair or replacement of such facilities.
15. If the Applicant fails, within nine months after the date a service requested by Applicant is installed, either in whole or in part, to make use of the service, the Applicant will reimburse NG for all costs of constructing, removing and retiring the service less any CIAC made by Applicant for the service, which will be forfeited.
16. This Agreement may be modified only by a writing signed by both parties; any verbal representations or modifications by NG employees or others shall be null and void.
17. The laws of the State of New Hampshire shall govern this Agreement.
18. If any terms of this Agreement or portions thereof are declared or become invalid or unenforceable, the remainder of this Agreement shall continue in full force and effect.
